

Introduction

Platform (<https://platform.myactionsport.com>) is the home for all customer admin tasks within the wider MAS ecosystem. Aspects of your accounts, such as [billing](/platform/billing/) (</platform/billing/>), [user management](/platform/users/) (</platform/users/>), [overlays](/platform/overlays/) (</platform/overlays/>) and [teams](/platform/teams/) (</platform/teams/>) are handled here.

In addition, every livestream started under your account will be visible to admin users on *Platform* - allowing you to create highlights and monitor account activity, regardless of the [visibility settings](/scoring/create-match/outputs/#visibility) (</scoring/create-match/outputs/#visibility>) used when setting up a match.

If you have a lot of people who may use your MAS subscription to score they do not need access to *Platform*, you should reserve access to people who need to create highlights or otherwise own the account. You can use your organisation's [quick access scoring code](/platform/quick-access-scoring-code/) (</platform/quick-access-scoring-code/>) to allow other people to score matches without needing them to have a username and password (or direct access to your backend).
