# Quick Access Scoring Code

Your organisation's quick access code grants non-admin users the ability to create and score games on the scoring (/scoring) application. Instead of forcing everyone to have a username/password or - worse still - sharing passwords, you can just share the quick code.

The quick code is only valid on the scoring (https://scoring.myactionsport.com) platform, and can only create games/livestreams - they cannot be used to manage the organisation's settings otherwise.

The quick code is always available in the sidebar, including a link that will allows users to immediately sign in using it.

You can also access your account's quick code in its settings page (https://platform.myactionsport.com/settings).

The quick code is as appears in an account's settings
